

HedgeCoin

WHITE PAPER

hedgecoin.finance

June 2024 v1.1

About

HedgeCoin aims to become the ultimate savings crypto asset, to achieve that, we are implementing a very special contract, featuring low supply, a deflationary scheme and introducing the first ever reflected/refracted finance token. The concept of reflected finance is not new, you'll get the benefits of autostaking but with no setbacks thanks to refracted finance, meaning, for example, that gas price won't rise no matter what. To make it short, your balance will grow automatically because of autostaking and the price should go up because of deflation, all these by just holding \$HDGC in your web3 wallet (BSC).

HedgeCoin represents a second chance for all of those who missed bitcoin at \$1, this is an opportunity for future wealth. HDGC is a BEP-20 token on the Binance Smart Chain.

Tokenomics

Initial supply: 20,000,000 HDGC

Buy/sell fee (DEX): 0.1%

- 0.035% distributed to holders (autostaking)
- 0.035% gets burned
- 0.03% dev wallet

Transfer fee: 1.25%

- 0.5% distributed to holders (autostaking)
- 0.5% gets burned
- 0.25% dev wallet

Fees cannot be higher by contract.

MaxBuy per address during sale rounds is 1,000 HDGC

Contract: [0x691a11a874e7117e1da1def897284ea85a845e4b](#)

The decreasing initial supply of HedgeCoin is 20 million, no HDGC can be minted, ever.

Timeline/Roadmap

HedgeCoin ITO

HedgeCoin Initial Token Offering consist of a pre-sale at \$1* and several (based on demand) sale-rounds at \$1.05*, starting April 2024

To buy HDGC simply send BNB (BSC) to the ITO contract address
0x69DCee85ffF2DD658232b1FE6c36A3959D2099Cd,
you can also scan the QR code with your web3 wallet App.

The max amount you can buy per address is 1000 HDGC, if you send more BNB than necessary the difference will go back to your wallet automatically.
Don't forget to add HDGC to your wallet.

*Fees apply.
